Precision Straightening

Since 1972, Centerless Grinding Service has been a leading supplier of centerless ground and polished products. Our attention to detail, experienced staff, and our advanced, precision equipment allow us to take on projects that often call for quick delivery and turnaround times for both large and small production volumes. We are experienced in processing carbon steel, alloy steel, stainless steel, tool steel, brass, bronze, aluminum, and copper, as well as exotic metals for industries ranging from automotive, marine, pulp and paper, medical, to food and textile. Our processes are in compliance with MIL-Q-9858A, MIL-I-45208A, and ISO standards
